RELEVANT WORK EXPERIENCE

April 2020 – PRESENT: Lead Web Developer – Online Internship – Evolve X

Evolve X is a program ran by Evolve Branding a world leading marketing company, based in Vancouver Canada. It bridges the gap for students seeking experience for employment, and for businesses, foundations and organizations who seek the labour but lack the start-up funds. I was assigned lead development role among a small team to develop an art brokerage site for users to buy and sell art. This site includes all the features of an e-commerce site with a focus on the sale of both budget and high value items, implementing crypto payments to minimalize payment overheads.

June 2018 – PRESENT: Freelance Web Developer

I have undertaken personal development through personal projects and have recently completed a large project for a client. This was an eCommerce website for a wholesale business, using PHP and MySQL for the back-end and JavaScript/jQuery for the front-end functionality and CSS for a responsive design. It includes the full functionality of a typical e-commerce site (such as customer accounts, products, order creation and payments) and is fully dynamic with an admin page for employees to edit the site. Link to the site: https://www.rymerdist.com.

I am continuously developing my web development skills and I am eager to learn newer & alternative technologies to keep up with the industry. I am currently learning React & Node.js.

EDUCATION

2016-2018: MSc Applied Finance | Ulster University, Belfast | Pass

2013-2016: BEng Software Engineering | Ulster University, Belfast | 2:2

PROGRAMMING SKILLS
